

# CREATING A BOOKMARK

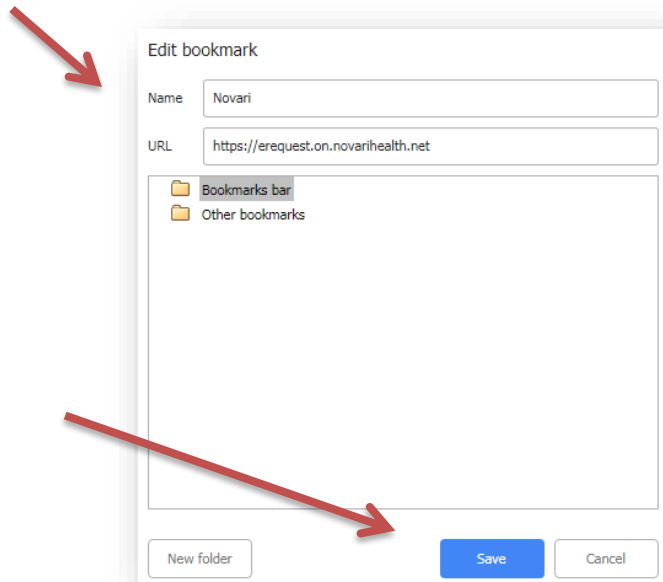

## Google Chrome Users:

1. Open your browser, and ensure your bookmarks bar is open. If you are unsure or need to open it click the  to the right of the url bar, select Bookmarks from the drop down list, which will show you a secondary list (if your bookmark bar is already open the Show Bookmarks bar will have a check mark beside it).

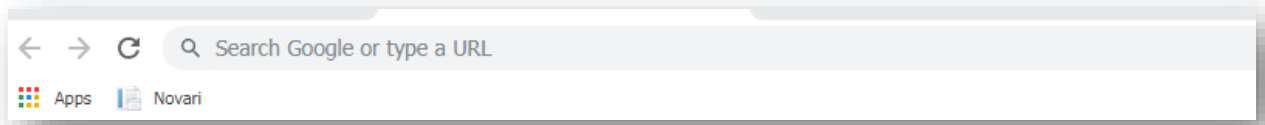

2. Now right click anywhere on the bar, and select add page from the menu
3. A pop-up will appear, Click in the Name field and type Novari

4. Click in the URL field and remove anything that is already displayed by default, then type or copy and paste the url: <https://erequest.on.novarihealth.net> & Click Save

5. Once you click Save the bookmark should now display on the bookmarks bar showing the Name that you created for it.

6. Now you can click this bookmark to load the login page each and every time you need to access the application.
