

Novari eReferral Update to Scheduling Widget

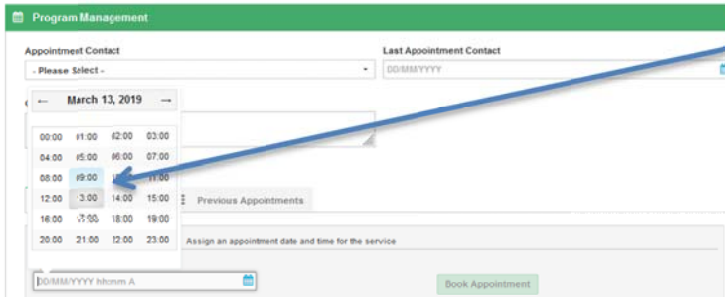

The scheduling widget for all receivers has recently been updated and the way in which you select your appointment dates and times will appear differently. See below for further instructions:

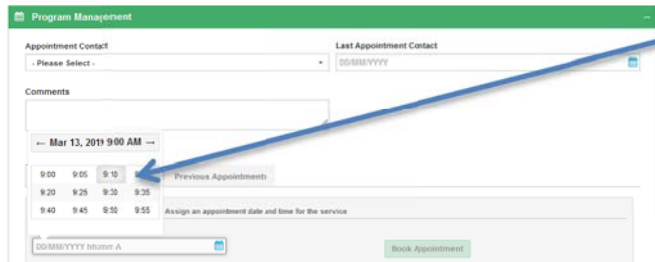

When entering an appointment date/time in the scheduling widget you can now click anywhere within the appointment field to open the calendar to select your date.

Once you select a date from the calendar, it will automatically take you to select a time by the hour

Once you select the hour it will then narrow the options by 5min intervals

*****YOU MUST SELECT THE TIME FROM THE INTERVAL TIMES TO BE ABLE TO BOOK THE APPOINTMENT*****
